

# A complete listing of all safe events

## Instant on-the-spot security reporting that will protect the reputation of your hotel

If there is any suspicion of theft, your security staff can print out a detailed report of exactly who opened the safe and when – vital evidence that could help resolve the situation instantly. If the guest is mistaken, or if there is an attempted fraud, this detailed printout can provide indisputable evidence that can

protect the valuable reputation of your hotel and staff. This can also dramatically reduce fraudulent liability claims, saving you time and money. In fact, many hotels report annual savings of over 40% on their liability losses after installing Elsafe safes with audit trail capabilities.

<p>Statistics and hotel information is always shown in the audit trail.</p>	<p>Hotel name: World Hotel                  Hotel ID: 00008246                  Room No.: 0123                  Safe Model: Infinity                  Serial No.: 4.800.002                  Last Service Open: 23.08.03 01:50 Bob Leash                  Last tamper: Never                  Operation hours: 45                  No. of Lockings: 7                  No. of Serv. Openings: 2                  Readout time: 24.08.03 15:17</p>	<p>The last service opening can never be deleted from the audit-trail.</p>
<p>All events are listed with exact time and date.</p>	<p>24.08.03 15:17 Locked                  24.08.03 15:17 Unlocked                  24.08.03 15:17 Locked                  24.08.03 15:17 Door Time-out                  24.08.03 15:17 Time-out                  24.08.03 15:17 Logoff</p>	<p>User did not close safe door properly when trying to lock it. Safe could therefore not lock and returned to open position.</p>
<p>Change of time and date is logged.</p>	<p>24.08.03 15:16 New Date/Time                  23.08.03 01:50 Old Date/Time                  23.08.03 01:50 Service Opened                  23.08.03 01:50 Logon</p>	<p>Identification of the person using the Safelink, with full name.</p>
<p>All incorrect guest codes are listed. This might unveil unfaithful staff members trying to guess codes.</p>	<p>ID: Bob Leash                  23.08.03 01:49 Incorrect Guest Code                  Code: 7446                  23.08.03 01:49 Incorrect Guest Code                  Code: 6756                  23.08.03 01:49 Incorrect Guest Code                  Code: 7656                  22.08.03 16:31 Locked                  22.08.03 16:30 Unlocked                  22.08.03 12:20 Locked                  22.08.03 12:19 Unlocked                  22.08.03 08:31 Locked                  22.08.03 08:27 Logoff                  22.08.03 08:27 Service Opened                  22.08.03 08:27 Logon                  ID: Johnny Olden                  22.08.03 08:26 Five Incorrect Codes                  22.08.03 08:26 Incorrect Guest Code                  Code: 4444                  22.08.03 08:26 Incorrect Guest Code                  Code: 3333                  22.08.03 08:26 Incorrect Guest Code                  Code: 2222                  22.08.03 08:25 Incorrect Guest Code                  Code: 1111                  22.08.03 08:25 Incorrect Guest Code                  Code: 0000                  21.08.03 16:16 Locked                  21.08.03 16:15 Unlocked                  21.08.03 08:35 Locked                  21.08.03 08:34 Time-out                  21.08.03 08:33 Logoff                  21.08.03 08:33 Service Opened                  21.08.03 08:33 Logon                  ID: Johnny Olden                  21.08.03 08:30 Tamper Activated</p>	<p>After five different incorrect guest codes the safe goes into a count-down. Then it can either be opened with the Safelink during the count-down or opened with user code after thirty minutes.</p>
<p>The guest has entered the code but forgotten to press the lock button.</p>	<p>Hotel Signature:                  -----                  Guest Signature:                  -----</p>	<p>If the back-cover has been removed and the safe prepared for future crime, this is logged*.</p>
<p>The Elsafe audit trail can be printed in the room while the guest is present. There is even a field for signature at the bottom.</p>		

\* If anti tamper function is applicable

## SYSTEM OVERVIEW

### Standard SafeLink System

SafeLink is fully compatible with

Infinity Collection

Sentinel Series

Classic S-series

M28

In-wall

The SafeLink safe security management system contains everything you need for setting up and maintaining all your Elsafe safes:

- Compaq Palm-sized PC with color screen, Windows® PocketPC software, mains charger, and PC synchronizing cradle.
- Elsafe SafeLink software, loaded on Compact Flash card, complete with set-up guide and manuals.
- SafeLink infra-red linked portable printer, complete with batteries and alternative mains supply unit.
- Infrared interface for connection between SafeLink and safe.

### SafeLink is also compatible with most earlier Elsafe systems

You use the same system for all the safes in your hotel, simplifying training and centralizing security.

You get a full-featured SafeLink safe management system, with easy-to-understand menus to guide your staff all the way, and a whisper-silent IR-connected thermal printer that makes even the most advanced operations a breeze.

You get SafeLink's system set-up and password security, which are far simpler and more secure than any previous system. Four different password levels enable you to decide what operations can be performed by each staff member.

You get the benefit of SafeLink's unique Security Management Report – even for systems that don't have a safe audit trail! Your SafeLink will maintain a complete record of every security management event, which can be printed out or viewed on screen at any time. This gives you full details of up to 1,000 staff events, including emergency openings, for all the safes in your hotel, new and old, which staff member has used the SafeLink, what operations have been performed, and even at what time!

### Print out details of up to 1,000 security management events

Every SafeLink operation is logged into its memory, and the last 1,000 events can be displayed or printed out at any time, just like the safe's audit trail.

This unique Security Management Report provides a complete record of every staff activity, unlike many other systems which only guard the safe at the 'front door' while the security management 'back door' is left wide open!

This report clearly lists every SafeLink operation, with the time and the identity of each user – a detailed SafeLink overview in seconds!

## Elsafe SafeLink

The ultimate security management tool for all Elsafe in-room safes

**The simplest and most secure system for managing your safes – in the palm of your hand!**

Elsafe's SafeLink handheld system brings simplicity and security to hotel safe management.

Not just for your Sentinel and Infinity safes, but for almost every safe that Elsafe has ever made!

Now you can set up and service all the safes in your hotel using our state-of-the-art handheld unit and Windows® Pocket PC software.

Our handheld system is simplicity itself. Easy-to-understand icons and touch-screen software guide you all the way. In next to no time you'll be able to open locked safes, program safes, print and read event logs.

Just as important, SafeLink's security management is much more secure than the master key override, or safe opening units found on other manufacturer's systems.
