

RFID Carriers

ContactLess

VingCard Elsafe offers a wide range of RFID carriers that are especially designed for different applications (for your guests, for your staff or for your VIP guests) and gives you the opportunity to enhance your guests' experience at your hotel.

All RFID carriers may be mixed within one property, providing you with flexible solutions. In a RFID system, Mifare Ultra Light cards are primarily used for guests and ATMEEL Crypto RF cards for staff. For scenarios where several applications are to share the same card or tag, Mifare 1K or 4K can also be used for guests, either as a PVC card, wristband or keyfob.

Typical hotel application:

- : Guests: Low cost guest keycards.
- : Staff: Long lasting staff keycards.
- : VIP guests: Keyfobs and cell phones.

Typical resort & spa application:

- : Guests: Wrist band for guest convenience and all-inclusive.
- : Staff: Long lasting staff keycards.
- : VIP guests: Wristbands or keyfobs.

Compatible with Near Field Communication (NFC) standards:

NFC technology enables RFID communication between our electronic locks with NFC-ready last generation cell phones.

- : Guests can receive an encrypted room key and room number to their cell phone prior to their arrival, thus no need to check in at front desk.
- : Guests can use their own NFC-ready cell phones to open VingCard's RFID locks.

Low cost guest keycards:
Cards may be customized at your request.

Long lasting staff keycards:
Cards may be customized at your request.

Keyfobs:
Tags may be e.g. a keychain, and can be customized at your request.

Wristbands:
The ideal RFID carrier for 'all-inclusive' resorts and spas.

Cell phone:
Compatible with NFC technology cell phones.
